# Press Release

**Key Green Solutions introduces a Sustainability Management Software Solution at EcoCare 2010 in London, Ontario. EcoCare is the only conference in Canada to speak directly to the link between healthcare, healthy communities, and the environment.**

**London, ON, October 18-19, 2010:** Key Green Solutions introduced its Sustainability Management software to many health care representatives and showed them how they can automate the tracking and reporting of energy, water, waste, sustainability projects and regulatory reports leading to many tangible and intangible cost-savings opportunities.

**The Company:** Key Green Solutions Sustainability Management Web-Based Software is helping health care organizations (Regional Tertiary Systems, Community Hospitals, Long-term Care and Hospital Laundry Facilities) make managing sustainability simple. The Key Green Solutions Sustainability Management software has been managing energy, water and waste for large hospital systems in the United States, including Spectrum Health System, since January 2009. The website is [www.keygreensolutions.com](http://www.keygreensolutions.com).

**For Release 8 a.m. EDT, November 1, 2010**
