

## **Key Green Solutions Enters Agreement to Provide Exclusive Sustainability Management Software to Maryland Hospital**

**March 8, 2011 FOR IMMEDIATE RELEASE**

Key Green Solutions, LLC (KGS), the leading hospital sustainability management software provider, announced today that it has entered into an agreement with Carroll Hospital Center (“The Hospital”) to provide exclusive Sustainability Management Software to the Hospital in Westminster, MD. The agreement represents an expansion for Key Green Solutions into the Mid-Atlantic market.

Jeffrey Burks, Relationship Manager for KGS, commented, “We are very pleased that Carroll has selected KGS as the provider of its sustainability management software. Maryland hospitals have been very progressive in their quest for sustainability programs promoting not just green efforts, but also efficiency and effectiveness with their energy, waste and water usage. Carroll is also a member of MDH2E ([e-commons.org/mdh2e/](http://e-commons.org/mdh2e/)), the cutting edge group that promotes environmental sustainability in health care. We welcome the high quality Carroll Hospital team to the KGS family and are looking forward to a mutually rewarding partnership with Carroll and the MDH2E group.”

Robert White, Assistant Vice President of Professional and Support Services for Carroll Hospital, states, “After a thorough assessment of our hospital’s sustainability program, we decided work with Key Green Solutions, because of their expertise in managing hospital sustainability programs and their commitment to delivering a robust dashboard of information. KGS will not only help our hospital become green but also be more efficient with the resources consumed. Of special interest is the unique capability of the KGS EDI interface, a proprietary interface which allows large volumes of vendor data to be processed automatically by the software. The software provides a dashboard for facility management and in-depth reporting to hospital management on key usage and performance metrics. With KGS as our partner, we will continue to enhance the facility performance and provide our patients with a green and efficient facility.”

### **About Key Green Solutions, LLC.**

KGS Key Green Solutions is a leading provider of a sustainability management software suite for Health Care. The organization is focused on hospitals and their quest for increasing their efficiency in managing and monitoring energy, waste, water, and hazardous waste as they deliver care in their facilities. KGS also provides a unique project management module within their software suite that helps to develop a “culture of sustainable practices” and “cost savings” management. The Company offers its software suite to hospitals, shared hospital laundry facilities and insurance companies to improve the organization by measuring and managing inputs and outputs of the facility. The product ultimately helps hospitals to reduce the cost of patient care in the facilities it serves. For more information, visit the KGS website at [www.keygreensolutions.com](http://www.keygreensolutions.com).

### **About Carroll Hospital**

Carroll Hospital is a private non-profit hospital providing leading-edge, patient-centered care to Northern Maryland residents in Carroll County. The hospital is a 195 bed facility. More than 400 physicians are on its medical staff representing over 38 medical specialties. Annually, more than 310,000 patient encounters for inpatient and outpatient medical care and community care are conducted at Carroll.
